

HEXAWARE

Stored Procedures to Java

Accelerate Your Stored procedures Modernization Journey

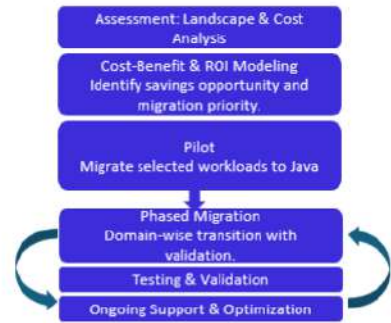

Worried about performance constraints of your stored procedures? Why Move from Java 1.8 or lower to Java 17 or greater?

Legacy stored procedures, while effective in their time, are increasingly becoming a bottleneck for modern IT environments. Their tight coupling with databases, lack of portability, and challenges in scaling cloud-native applications are putting pressure on organizations to rethink their application architecture.

Hexaware helps organizations modernize their legacy stored procedures by transitioning them to Java, enabling agility, scalability, and cloud-readiness. Our structured approach ensures continuity, performance, and measurable business value, empowering enterprises to unlock the full potential of their data platforms.

Eliminate	• high operational costs	• Legacy Architecture	• vendor lock-in	• Performance constraints
Boost	• Scalability & flexibility	• Faster innovation and development	• Long-term operational savings	• Easier integration with modern platforms

Move fast with Hexaware to ace your transformation

Next Steps? – Join our Pilot Program

- Perform automated schema and dependency assessment and deliver detailed migration report
- Execute Pilot for x processes within 2-3 weeks
- Validate data accuracy and performance, then finalize the enterprise migration roadmap in a week

Assessment +3 procedures migration
\$ 50,000 USD

Business Benefits
