

Future proof your business by moving from *Java 1.8 or lower to Java 17 or greater*

Accelerate your Java Modernization

Challenges with java 1.8

Legacy
architecture

High operational **costs**

Security and
Compliance **risks**

Scalability, flexibility and
integration **issues** with
modern cloud

Performance constraints
and obsolete **ecosystem**

Our Recommendations

Modernize your apps to
microservices based architecture

Re-Architect to java 17 or greater

Build a **future ready application**
ecosystem for high-Performance and
scalability
