

Future proof your business by moving from *Stored Procedures to JAVA*

Transform stored procedures to modern Java microservices

Challenges with Stored Procedures

 **Legacy**
architecture

 High operational
costs

 Security and
Compliance **risks**

 Scalability, flexibility
and modern cloud
integration constraints

 Expensive vertical scaling
and performance
constraints with high
latency

Our Recommendations

Modernize stored procedures
into Java microservices to unlock
cloud-native agility

Re-Architect to JAVA

Leverage Amaze® AI automation for up to
70% automation across assessment, code
transformation, testing, and deployment
